DETAILED ACTION

FIRST ACTION ON THE MERITS

Claims 1-23 are currently pending in the instant application.

I. *Priority*

The instant application is a 371 of PCT/EP03/13206, filed on November 25, 2003, which claims benefit of EPO Application 10259245.4, filed on December 17, 2002.

II. *Information Disclosure Statement*

The information disclosure statement (IDS) submitted on June 16, 2005 is impartial compliance with the provisions of 37 CFR 1.97 because of missing copies of references listed under the Foreign Patent Documents section. Accordingly, the information disclosure statement in-part has been considered by the examiner.

III. *Rejection(s)*

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 15-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The phrase "Use of a derivative" is written in improper format because a "use" can only be properly claimed as a process or method.

IV. Objections

Claim Objections

Claims 12-14 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 11. When two or more claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Since claims 11-14 are drawn to products, the use of these claims is not given any patentable weight.

Abstract Objection

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because of the use of the term "said" which is legal phraseology. Correction is required. See MPEP § 608.01(b).

V. Allowable Subject Matter

Claims 1-10 and 19-23 are considered allowable over the closest prior art of US Patent application 20010051181 A1.
